

POST EVENT REPORT

CyberSec Network

One Day Online Summit.
06 Nov 2020

Thank You!

Thank you to everyone who joined us and took part in FinTech Network Summit 2020. We are honoured to have such excellent speakers, sponsors, exhibitors, attendees, and partners support the FinTech Network Summit.

On 06 Nov, at CyberSec Network Summit, over 500 attendees gathered together for networking, learning, and innovation, as we explored where Tech is set to take us in 2020 and beyond. 500 delegates from the world of Cybersecurity, heard subjects including:
AI, Cloud, Cyber attack, Protection and many more..

Connections were made through facilitated meetings in a networking break, which had its own dedicated zone for meetings, as well as the more informal interactions during breaks.

Work has already started on another event where we plan to expand the content, giving you the opportunity for more interaction. We expect more exhibitors and more attendees so make sure you visit our website.

KEY DISCUSSIONS

It was a great platform to express our view. The interaction with other members went well. It was very well organized and hosted by Tech Network

Yogesh Kumar
Head IT - Tata Power

Prashant

Thanks a lot for great coordination. It was good to be a part of the esteemed panel at Tech-Network Summit

Amit Sharma
Director - Ericsson

Prashant Sinha

Adaptive Security Architecture

Proactive Exposure Assessment, Predict Attacks, Baseline Systems, Remediate/Make Change, Design/Model change, Investigate/Forensics, Harden and Isolate Systems, Divert Attackers, Prevent Incidents, Detect Incidents, Confirm and Prioritize, Contain Incidents

Gartner's take !!

Vishal Roday 6th Nov 2020, 2:49 PM

good sessions going on, interesting platform

AbRAR Khan 6th Nov 2020, 2:12 PM

Sahil Jangra 6th Nov 2020, 4:11 PM

From the initial challenges of working from home to the telecommuting adjustments that are in place now, organizations have started using different collaborative tools and methods to adapt to the new normal and stay on top of customer requests.

For vendors, it's become all the more important to be able to quickly provide these solutions. However, how they achieved this has been kept tightly under wraps.

Now ManageEngine is bringing these narratives to light to showcase the IT stores lived and breathed across the world. Register now to hear IT tales from teams similar to yours, and get inspired to implement some or all of the methods in your organization!
